

Barrow Hanley Concentrated Emerging Markets ESG Opportunities Fund Institutional | BEOIX

INVESTMENT OBJECTIVE

The Fund seeks long-term capital appreciation and consistent income.

INVESTMENT OVERVIEW

We believe markets are inefficient, and that these inefficiencies can best be exploited through adherence to a valuation centric investment process dedicated to the selection of securities on a bottom-up basis. The team focuses primarily on fundamental securities analysis, valuation, financially material ESG factors, and prospects for a return to fair valuation.

³Cash represents cash and any short-term or overnight investments held by the Fund.

⁴Top issuers are shown as % of total net assets. Information about the Fund's issuers should not be considered investment advice. There is no guarantee that the Fund will continue to hold any one particular security or stay invested in any one particular sector. Holdings are subject to change at any time.

Risks: The Fund's returns will vary, and you could lose money by investing in the Fund. Large-cap companies are generally more mature and the securities issued by these companies may not be able to reach the same levels of growth as the securities issued by small or mid-cap companies. The value of small and mid-cap equity securities may decrease in response to the activities of those companies or market and economic conditions. Diversification does not ensure against loss. International investing involves special risk considerations, including currency fluctuations, lower liquidity, economic and political risk. Investing in emerging markets can increase these risks, including higher volatility and lower liquidity. Investing in Chinese securities involves a higher degree of risk and special considerations not typically associated with investing in other more established economies or securities markets. The Fund's investment exposure to China may subject the Fund, to a greater extent than if investments were made in developed countries, to the risks of adverse securities markets, exchange rates and social, political, regulatory, economic, or environmental events and natural disasters that may occur in the China region. Investing in China A-Shares through the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programs is subject to trading, clearance, settlement, and other procedures, which could pose risks to the Fund. Funds may underperform other similar funds that do not consider conscious company/ESG guidelines when making investment decisions.

Please carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information is contained in the Fund's prospectus and summary prospectus, which you may obtain by calling +1-866-778-6397. Read the prospectus and summary prospectus carefully before investing. Investing includes the risk of loss.

Some of the information contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar, its content providers, nor the AMG Funds are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. The Morningstar Rating is for the share class indicated only (see ticker); other share classes may have different performance characteristics. The ranking may reflect the waiver of all or a portion of the fund's fees. Without such waiver, the rankings may have been lower.
