

## Barrow Hanley International Value Fund

Institutional | BNIVX

### INVESTMENT OBJECTIVE

The Fund seeks to obtain higher returns compared to the MSCI EAFE Index, while maintaining lower risk.

### INVESTMENT OVERVIEW

We believe markets are inefficient and that these inefficiencies can best be exploited through adherence to a valuation-centric investment process dedicated to the selection of securities on a bottom-up basis. Our team focuses primarily on fundamental securities analysis, valuation, and prospects for a return to fair valuation.

<sup>2</sup> **Price/Book Value Ratio:** The market value of a company's shares (share price) over its book value. **Price/Earnings Ratio:** The ratio for valuing a company that measures its current share price relative to its earnings per share (EPS).

<sup>3</sup> Cash represents cash and any short-term or overnight investments held by the Fund.

<sup>4</sup> Top ten holdings are shown as % of total net assets. Information about the Fund's holdings should not be considered investment advice. There is no guarantee that the Fund will continue to hold any one particular security or stay invested in any one particular sector. Holdings are subject to change at any time.

**Risks:** The Fund's returns will vary, and you could lose money by investing in the Fund. International investing involves special risk considerations, including currency fluctuations, lower liquidity, economic and political risk. Investing in emerging markets can increase these risks, including higher volatility and lower liquidity. Investing in smaller and medium capitalization companies involves special risks, including higher volatility and lower liquidity. Small and mid-cap stocks are also more sensitive to purchase/sale transactions and changes in the issuer's financial condition. The Fund invests most of its assets in equity securities of international value companies where the primary risk is that securities may be unprofitable if the market fails to recognize their intrinsic worth or the portfolio manager misgauged that worth. Diversification does not ensure against loss.
