

Barrow Hanley US Value Opportunities Fund

Institutional | BVOIX

INVESTMENT OBJECTIVE

The Fund seeks to achieve risk-adjusted equity returns in excess of the Fund's benchmark over multiple year time periods.

INVESTMENT OVERVIEW

As a pure value manager, we seek quality companies that are temporarily undervalued for reasons we can identify, understand, and believe will improve over time. In our valuation framework, we strive to construct portfolios that trade at levels below the market across multiple metrics including (P/E, P/B, EV/EBITDA) while simultaneously delivering an above-market dividend yield.

IMPORTANT INFORMATION

¹ The Russell 1000® Value Index is an unmanaged index generally representative of the US market for larger capitalization value stocks. It is not possible to directly invest in an unmanaged index. The Russell 1000® Value Index and Russell® are trademarks of Frank Russell Company.

² **Price/Book Value Ratio:** The market value of a company's shares (share price) over its book value. **Price/Earnings Ratio:** The ratio for valuing a company that measures its current share price relative to its earnings per share (EPS). **Enterprise Value/Earnings Before Interest, Taxes, Depreciation, and Amortization:** A financial metric used to assess a company's valuation, comparing its total value to its earnings before certain expenses.

³ Cash represents cash and any short-term or overnight investments held by the Fund.

⁴ Top ten holdings are shown as % of total net assets. Information about the Fund's holdings should not be considered investment advice. There is no guarantee that the Fund will continue to hold any one particular security or stay invested in any one particular sector. Holdings are subject to change at any time.

Risks: The Fund's returns will vary, and you could lose money by investing in the Fund. The Fund invests most of its assets in equity securities of value companies where the primary risk is that securities may be unprofitable if the market fails to recognize their intrinsic worth or the portfolio manager misgauges that worth. Large-cap companies are generally more mature and the securities issued by these companies may not be able to reach the same levels of growth as the securities issued by small or mid-cap companies. The value of small and mid-cap equity securities may decrease in response to the activities of those companies or market and economic conditions. Diversification does not ensure against loss. The Fund may invest in equity securities of international companies which have a greater degree of risk and increased volatility due to political and economic instability of some overseas markets. Changes in currency exchange rates and different accounting and taxation policies outside the US can affect returns. Real estate securities, including Real Estate Investment Trusts (REITs) may be subject to additional risks, including interest rate, management, tax, economic, environmental and concentration risks. The Fund may underperform other similar funds that do not consider conscious company/ESG guidelines when making investment decisions.

Please carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information is contained in the Fund's prospectus and summary prospectus, which you may obtain by calling +1-866-778-6397. Read the prospectus and summary prospectus carefully before investing. Investing includes the risk of loss.

Neither Morningstar, its content providers, nor the AMG Funds are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five-, and ten-year (if applicable) Morningstar Rating metrics. The Morningstar Rating is for the share class indicated only (see ticker); other share classes may have different performance characteristics. The ranking may reflect the waiver of all or a portion of the fund's fees. Without such waiver, the rankings may have been lower.
