

Barrow Hanley Emerging Markets Value Fund

Institutional | BEMVX

INVESTMENT OBJECTIVE

The Fund seeks long-term capital appreciation and consistent income from dividends.

INVESTMENT OVERVIEW

We believe markets are inefficient and that these inefficiencies can best be exploited through adherence to a valuation-centric investment process dedicated to the selection of securities on a bottom-up basis. Our team focuses primarily on fundamental securities analysis, valuation, and prospects for a return to fair valuation.

Risks: The Fund's returns will vary, and you could lose money by investing in the Fund. International investing involves special risk considerations, including currency fluctuations, lower liquidity, economic and political risk. Investing in emerging markets can increase these risks, including higher volatility and lower liquidity. Investing in smaller and medium capitalization companies involves special risks, including higher volatility and lower liquidity. Small and mid-cap stocks are also more sensitive to purchase/sale transactions and changes in the issuer's financial condition. The Fund invests most of its assets in equity securities of international value companies where the primary risk is that securities may be unprofitable if the market fails to recognize their intrinsic worth or the portfolio manager misgauged that worth. Diversification does not ensure against loss.

Please carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information is contained in the Fund's prospectus and summary prospectus, which you may obtain by calling +1-866-778-6397. Read the prospectus and summary prospectus carefully before investing. Investing includes the risk of loss.
