

Barrow Hanley Floating Rate Fund

Class I | BFRNX

INVESTMENT OBJECTIVE

The Fund seeks to maximize total return, consistent with the preservation of capital.

INVESTMENT OVERVIEW

We believe markets are inefficient, and that these inefficiencies can best be exploited through adherence to a valuation centric investment process dedicated to the selection of securities on a bottom-up basis. Additional market forces of rate volatility, market liquidity, new issue underwriting activity and fund flows, among other influences, create inefficiencies that provide trading opportunities.

Morningstar Rating™

In the Morningstar US Fund Bank Loan category, BFRNX received an overall rating of 5 stars based on risk-adjusted returns and 3-year rating of 5 stars out of 232 funds as of 12/31/22. See back page for more information.

PERFORMANCE

	QTD	YTD	1 Yr	3 Yr	5 Yr	Since Inception (6/1/18)*
Class I	3.23	-1.41	-1.41	2.16	—	3.25
Credit Suisse Leveraged Loan Index <sup>1</sup>	2.33	-1.06	-1.06	2.34	—	3.03

\*The Fund acquired substantially all of the assets of another investment vehicle (the "Predecessor Fund") on April 12, 2022 in exchange for shares of the Fund, and the Fund commenced operations on such date. Inception date shown is for the Predecessor Fund.

*Performance cited represents past performance. Past performance does not guarantee future results and current performance may be lower or higher than the data quoted. Returns shown assume reinvestment of dividends and capital gains. Investment returns and principal will fluctuate with market and economic conditions and you may have a gain or loss when you sell shares. For the most current month end performance information, please call +1 866 778 6397.* Class I shares are available only to investors who meet certain eligibility requirements. Class Y shares can be made available to the general public without a sales load.

TOP TEN ISSUERS<sup>4</sup>

IMPORTANT INFORMATION

- <sup>1</sup> The Credit Suisse Leveraged Loan Index tracks the investable market of the US dollar denominated leverage loan market. All loans are funded term loans with a tenor of at least one year and are made by issuers domiciled in developed countries. It is not possible to directly invest in an unmanaged index.
- <sup>2</sup> **Yield to Maturity:** The percentage rate of return for a bond assuming that the investor holds the asset until its maturity date. **30-Day SEC Yield:** Reflects the dividends and interest earned during the fund's most recent 30-day period after expenses. **30-Day SEC Yield (unsubsidized):** 30-Day SEC yield but does not reflect fee waivers or reimbursements.
- <sup>3</sup> Cash represents cash and any short-term or overnight investments held by the Fund
- <sup>4</sup> Top issuers are shown as % of total net assets. Information about the Fund's issuers should not be considered investment advice. There is no guarantee that the Fund will continue to hold any one particular security or stay invested in any one particular sector. Holdings are subject to change at any time.
- <sup>5</sup> Ratings shown are given by one of the following national rating agencies: S&P, Moody's or Fitch. Credit ratings are subject to change. If there are two or three ratings for a security, the simple average of those ratings is used. If only one of the agencies rates a security, that rating is used. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. U.S. government and agency mortgage-backed securities, if owned by the Fund, are included in the U.S. Treasury/Agency category (included only if applicable). Holdings designated NR are not rated by these national rating agencies and, where applicable, include net derivative positions.
- <sup>6</sup> Sector diversification excludes cash equivalents.

**Risks:** The Fund's returns will vary, and you could lose money by investing in the Fund. Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise. The Fund may invest in obligations with interest rates that are reset periodically, and the value of floating rate securities may decline if their interest rates do not rise as quickly, or as much, as general interest rates. Collateralized Loan Obligations (CLOs) are debt securities issued in different tranches, with varying degrees of risk, and backed by an underlying portfolio consisting primarily of below investment-grade corporate loans. The return of principal is not guaranteed, and prices may decline if payments are not made timely or credit strength weakens. CLOs are subject to liquidity risk, interest rate risk, credit risk, call risk and the risk of default of the underlying assets. High-yield bond issuers are usually not as strong financially as investment-grade bond issuers and, therefore, are more likely to suffer an adverse change in financial condition that would result in the inability to meet a financial obligation. Accordingly, securities and loans involving such companies carry a higher risk of default and should be considered speculative. Investments in bank loans may be subject to limited public information and difficult to value. The secondary market for bank loans may be subject to irregular trading and wide bid/ask spreads, which may cause the Fund to be unable to realize the full value of its investment in the bank loan.

**Morningstar Rating™** for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

*Please carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. This and other information is contained in the Fund's prospectus and summary prospectus, which you may obtain by calling +1-866-778-6397. Read the prospectus and summary prospectus carefully before investing. Investing includes the risk of loss.*
